1: Holmberg--27 [2] (1941-42) 1950 Siriono
116, 226, 227

"Unlike many of his South American Indian contemporaries, who developed or adopted the fishhook, traps, nets, or poisoning as methods of catching fish, the Siriono does all his fishing with the bow and arrow. His less developed techniques consequently shut him out from a large supply of fish that is found in the area, and has limited fishing largely to the dry season, the months of July, August, September, and October, when the rivers and lakes are low and the waters are clear. At this time there is an abundance of fish in the low waters around the rapids, and these are caught either by shooting them with the bow and a barbed chonta-headed arrow or by stabbing them with an arrow."
